MOVING WORK FORWARD

When building owners and operators seek world class solutions, they look to Lerch Bates Logistics team of consultants as a single, integrated source for operational assessments, programming and design of supply chain management and “back of house” support services.

Our consultants will assess your operations, educate your staff on evolving technologies and create new operational programs for your current or new facility. This translates our design into one that maximizes operational efficiency. Our approach integrates these operations and insures that the department adjacencies, layout and flow fit the required functions, enabling the building owner/operator to avoid increased operational costs.

Our professional staff has unparalleled experience in the areas of:

- Supply Chain / Materials Management
- Waste Management / Environmental Services
- Materials Handling and Distribution
- Service Docks
- Central Sterile Processing
- Vertical and horizontal circulation of people and materials

We utilize the following methodologies and approaches for all our project work:

- Patient Safety
- Sustainable Design
- Lean Design
- Value Engineering
- Evidence Based Design
- Acuity Adaptable Design

Our professional team will guide you through the programming, design and construction of your project, as well as train your staff on the proper departmental, internal equipment and building systems operations.

Building Insight expresses our in-depth knowledge and experience. To address complex systems, Lerch Bates consultants don't replicate, they innovate. We are at the forefront of innovation in architectural, organizational and operational systems for “back of house” support areas and bring a creative approach to each project.

SoBella Retail, Project CityCenter, Las Vegas, Nevada, USA

Children's Hospital, Denver, Colorado, USA

Capital Market Authority (CMA) Tower, Riyadh, Saudi Arabia
