

Operational Assessments

In an era of tightening budgets and strained resources, efficiency and productivity are more important than ever. Lerch Bates Inc. is an industry leader in supply chain management and “back of house” operational consulting. Our experts will help your organization cut costs and streamline operations through a thorough assessment of your operational systems and infrastructure.

From supply chain management to waste management systems and every system in between, our consultants can uncover areas where efficiencies can be gained and opportunities can be capitalized on. Where issues are uncovered, Lerch Bates will advise your team on the most realistic solution, and will provide implementation support as needed.

Our team helps clients in a wide range of industries, with specific emphasis in the healthcare industry, including hospitals ranging from community to academic medical centers.

Our professional staff can provide Operational Assessments in the areas of:

- Supply Chain/Materials Management
- Supply Distribution
- Distribution Centers
- Linen Management
- Service Docks
- Sterile Processing
- Waste Management
- Vertical And Horizontal Circulation Of People And Materials

To learn more about our Operational Assessment services, please visit www.LerchBates.com or call 303.795.7956.
